

Rap 1 2 3

First verse, easy rap, flow like water, running out the tap.
Nice and easy, one, two, three, this is how you'll start to M.C.
I'll flow with you, you flow with me, we'll sail on the beat, like a boat on the sea.
Before you know it, this beat will have gone, well done, you finished verse one.

Verse two will get a bit tricky, keep concentrating, it will go quickly.
Keep it together as we advance into this verse,
rhythms increase when compared to the first.
Keep on point, you know it takes practice,
over and over and over and over if you want to practice.
I'll flow with you, if you'll flow with me,
verse one and two is easy compared to three.

Verse three, pay attention to me, rhythm's and rap's are gonna get tricky.
Check every rapper and flow in the show, give us the mike and we're ready to go.
We're coming.....
Now I know it sounds silly, believe me, you can do it with practice easily.
It's something that you haven't done before, try it again on the count of four.

Please don't be worried if it sounds a little wrong,
Congratulations, you've completed this song
